timecapture tracker

TimeCapture Tracker, an intelligent digital solution for tracking, verification and geolocated supervision of field operations.

Timecapture Tracker allows you to:

- Geotag field operations in real-time.
- Automatically timestamp all activities performed.
- Verify and validate interventions using visual evidence (photos, videos, signatures).
- Contact operators directly from the platform for any clarification.
- Analyze performance via dynamic dashboards and automated reports.

An All-in-One Solution:

1. Mobile application for field teams
2. Secure web platform for supervisors and regulators
3. Centralized and historical database
4. Geolocation-based, time-stamped, and verifiable tracking

Key Advantages

1. Real-time monitoring of field operations.

2. Complete data reliability and traceability.

3. Enhanced transparency and accountability.

4. Reduced supervision and validation time.

5. Easy integration with existing systems.

Areas of Application

- Monitoring of public projects (infrastructure, agriculture, energy, environment)
- Oversight of delegated operators (water, electricity, transport, telecommunications)
- Supervision of service providers (maintenance, security, cleaning)
- Verification of subsidized or regulated activities

Windows Linux Android
